Product Designer

Senior Product Designer with 6+ years of experience designing B2C mobile products, community platforms, healthcare, and enterprise applications. Experienced in owning features end-to-end, from discovery and research to implementation with engineering teams. Strong product mindset with extensive experience using Claude Code and AI tools to accelerate UX research, prototyping, design reviews, and Design System maintenance. Comfortable working independently in autonomous product teams and driving data-informed design decisions.

Design Experience

JANUARY 2020 - PRESENT | SENIOR PRODUCT DESIGNER | PAR RETAIL (FORMERLY STUZO)

Projects:

- **MyClimb** - B2C mobile app for the climbing community, focused on engagement, retention, and social interaction.
- **Chevron Rewards** - loyalty mobile app for a leading fueling company, including rewards, payments, subscriptions, personalized offers, and fueling experiences.

Key responsibilities:

- Owned end-to-end design of product features from discovery through delivery across mobile and web.
- Collaborated closely with Product Managers, engineers, and clients to define product strategy, validate requirements, and prioritize solutions.
- Defined UX hypotheses together with Product Managers.
- Designed user flows, wireframes, interactive prototypes, and high-fidelity UI.
- Conducted user interviews, usability testing, competitor research, and UX discovery to validate design decisions.
- Presented design concepts and facilitated design reviews with stakeholders and development teams.
- Worked closely with engineering throughout implementation to ensure high-quality execution.
- Led quarterly accessibility reviews across iOS and Android products.
- Built, maintained, and continuously reviewed the Design System to improve consistency, scalability, and development efficiency.
- Supported A/B testing by designing experiment variants and evaluating results.

- Used **Claude Code** and AI agents daily to accelerate product design workflows, including:
 - rapid UX research and competitive analysis;
 - generating user flows and design explorations;
 - reviewing Design System consistency;
 - AI-assisted design reviews to identify UX, accessibility, and UI issues;
 - validating completed designs before handoff;
 - creating documentation and implementation-ready specifications.

OCTOBER 2022 - APRIL 2024 | UI/UX DESIGNER | TECH4MED

Healthcare platform digitizing the pharmaceutical supply chain.

Key responsibilities:

- Led redesign of a complex web platform with a focus on usability and operational efficiency.
- Designed a mobile application for healthcare professionals.
- Created and maintained a scalable UI Kit.
- Collaborated with product owners and engineers to simplify complex workflows and improve task completion.
- Conducted UX research and usability validation throughout the design process.

FEBRUARY 2019 - JANUARY 2020 | UI/UX DESIGNER | KPMG

Project: Lyfegen – digital platform connecting pharmaceutical companies and hospitals.

Key responsibilities:

- Conducted UX research, competitor analysis, and discovery workshops.
- Designed complex enterprise workflows, user journeys, and interactive prototypes.
- Collaborated closely with business stakeholders and engineering teams.
- Delivered production-ready UI and supporting design assets.

SEPTEMBER 2018 - FEBRUARY 2019 | GRAPHIC/WEB DESIGNER | SKYLUM

A software company developing AI-powered photo editing applications for professional photographers and creators.

Key responsibilities:

- Designed landing pages, marketing websites, banners, and digital campaigns.
- Collaborated with marketing and product teams to improve conversion and engagement.
